iLINK RVP

Linkable tri-colour DMX laser effects

M A N U A L V E R S I O N 5 . 0

18 / 04 / 12

100mW Red + 150mW Violet / colour mixed to equal Pink
Plug & Play operation & built-in patterns
Linkable as a kit in Master/Slave mode
Auto, Sound-to-Light & DMX512 modes
10 channel DMX512 operation
LED function display
3 pin XLR DMX connection
Fan cooled operation
Key operated safety control
Safety mounting point
Adjustable hanging bracket
Tough metal chassis

Thank you for purchasing this KAM product, we are sure that it will serve you for many years to come.

To optimise the performance of this product, please read these operating instructions carefully to familiarise yourself with the basic operations of this unit. After you have read the instructions, please retain them for future reference.

This unit has been tested at the factory before being shipped to you.

To prevent or reduce the risk of electrical shock or fire, do not expose the unit to rain or moisture. To prevent a fire hazard, do not expose the unit to any naked flame sources. Unplug this apparatus during lightning storms or if it is unlikely to be used for long periods of time.

When installing the unit, please ensure you leave enough space around the unit for ventilation. Slots and openings in the unit are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. To prevent fire hazard, the openings should never be blocked or covered.

Always handle the power cable by the plug. Never pull out the plug by pulling on the cable. Never touch the power cable when your hands are wet as this could cause an electric shock. Do not tie a knot in the cable. The power cable should be placed such that it is not likely to be stepped on. A damaged power cable can cause a fire or give you an electrical shock. Check the power cord periodically, if you ever find that it is damaged, replace it before using the unit again. Contact your retailer for a replacement.

The voltage of the available power supply differs according to country or region. Be sure that the power supply voltage of the area where this unit is to be used meets the required written on the unit.

The lightning flash symbol inside a triangle is intended to alert the user to the presence high voltage within the unit's enclosure that may be of sufficient power to constitute a risk of electrical shock to persons.

Caution: to prevent the risk of electric shock, do not attempt to open the unit. No user-serviceable parts inside. Refer all servicing to qualified service personnel.

The exclamation mark inside a triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the appliance.

Any modification carried out on the unit may invalidate the unit's warranty.

If applicable, only use the stand, tripod or bracket specified or sold with the apparatus.

Select the installation location of your unit carefully. Avoid placing it in direct sunlight or locations subject to vibration and excessive dust. Do not use the unit where there are extremes in temperature (below 41°F / 5°C or exceeding 95°F / 35°C).

Unpacking and safety: Please unpack your new product carefully, your new product should reach you in perfect condition. Please check that no damage has occurred during transit. If any damage is found, do not operate your unit. Please contact the retailer you purchased it from immediately. If there is any damage to the mains cable do not use the device. Always disconnect the unit from the mains supply when carrying out any servicing or cleaning of the unit.

The serial number for this equipment should be located on the rear or underside of the unit. Please make a note of this number as you will need it for your warranty, it is a good idea to keep a copy of the serial number for your own records.

Panel

NO.	NAME	DESCRIPTION
1	Power LED	Indicates the fixture is switched on
2	Music LED	Synchronize to detected music signal
3	Laser Aperture	The laser effect output aperture. NEVER LOOK INSIDE THE FIXTURE THROUGH THIS APERTURE WHILE FIXTURE IS OPERATING.
4	Power Switch	Switch ON and OFF the fixture
5	Fuse Holder	Replace fuse with correct value if required
6	Main Power Input	IEC socket and integrated fuse holder.
7	DMX Input/Output	3 pins male/female XLR connector
8	Key switch	Safety key switch operates laser output
9	Safety eye	Attach the safety cable/chain
10	Control panel	To control the fixture with digital LED display, check more information on control & function
11	Microphone	To detect the music/sound signal

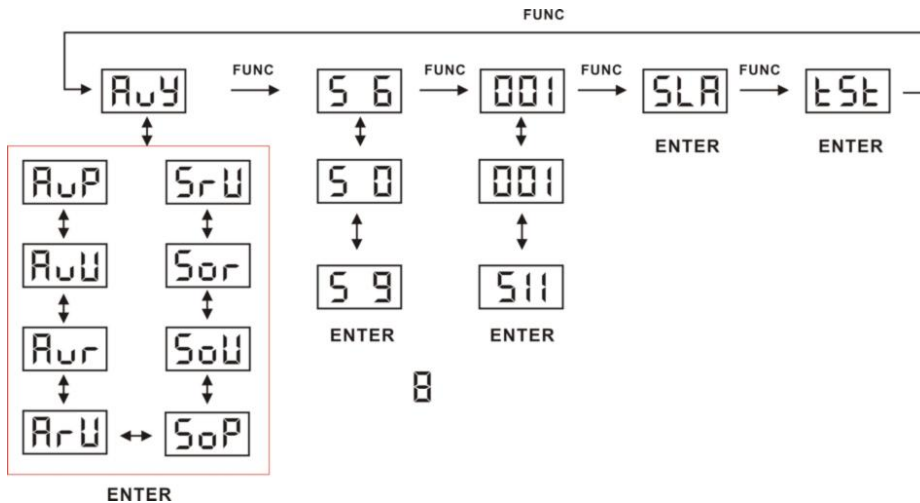

Control & Function

Regular breaks during operation are essential to maximize the life of this device as it is not designed for continual use.

Do not switch the unit on and off in short time intervals. Always unplug the unit when it is not used for a longer time or before replacing the bulb or start servicing. In the event of serious operation problems, stop using the fixture and contact your dealer immediately.

ATTENTION: Laser will be output from laser aperture in 5 seconds after the unit is powered on.

Operation

Standalone pre-program laser show

Press FUNC to enter MODE OPTION.

Till to LED panel shows either one of AuP, AuU, Aur, ArU, SoP, SoU, Sor, SrU.

Press UP or DOWN to select your favorite Stand Alone mode as above. Press ENTER to confirm the setting.

The laser is working in stand alone. Each time when you turn on your laser, you will have this confirmed laser show.

In the MODE OPTION setting, the stand alone laser show that you are going to choose is flashing. Press UP or DOWN to change stand alone laser show, you will have 8 different stand alone preprogrammed laser show. Their DISPLAY and EFFECT are listed below:

DISPLAY	STAND ALONE MODE LASER EFFECT
AuP	AUTOMATIC SHOW with PINK colour
AuU	AUTOMATIC SHOW with single VIOLET colour
Aur	AUTOMATIC SHOW with single RED colour
ArU	AUTOMATIC SHOW with single RVP colours
SoP	SOUND ACTIVATED SHOW with PINK colour
SoU	SOUND ACTIVATED SHOW with single VIOLET colour
Sor	SOUND ACTIVATED SHOW with single RED colour
SrU	SOUND ACTIVATED SHOW with single RVP colours

Sound activated mode sensitivity setting

Press FUNC till to see S**.

Press UP/DOWN to set microphone sensitivity. S 0 is no sound activation, from S1 to S9 is sound activated, S1 min S9 max.

Press ENTER to confirm and save the setting.

The sound sensitivity can be adjusted to determine how sensitive the laser is to sound. In the S** mode there are 10 different options.

Zero = sound off

1-9 = from low to high sensitivity

A suggested setting would be in the range of 5-7. If this range is too sensitive reduce the value, if more sensitivity is required increase the value. Remember to press enter to confirm your selection.

This setting will remain in the memory when powered off (and permanently stored in the flash memory).

DMX mode

Press FUNC to enter MODE OPTION.

Till to LED panel shows 001.

Use the up / down buttons to select the desired DMX starting address

Press ENTER to confirm the setting.

Master/slave mode

Linking several units without a DMX controller

Master unit

Press FUNC and select desired auto option sound or auto

Press the enter button to confirm

Slave unit

Press the mode button until LED panel shows SLA

Press ENTER to confirm the setting.

All units set to SLA will follow the master unit

These must be linked together using a 3pin XLR DMX cable (not supplied)

Note: only one unit must be set to master all other units set to slave.

TESTING MODE

Press FUNC to enter MODE OPTION.

Until the LED panel shows tSt.

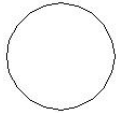

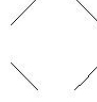

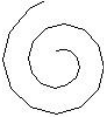

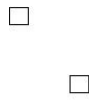

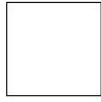

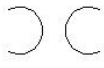

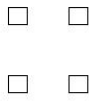

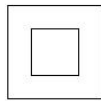

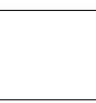

Press ENTER to confirm the setting.

The laser is working in "TEST MODE". In this mode a fixed testing pattern is run as a short demo and laser beam test to show correct working. This mode is for service only.

Specifications

Mains Input	AC100-240V, 50/60Hz
Fuse	250V 1 A Slow Blow (20mm Glass)
Total Power	12W
Music Control	Internal microphone
Laser Power	100mW Red + 150mW Violet / colour mixed to equal Pink
Green Laser Medium	DPSS Nd:YVO4, 532nm
Red Laser Medium	LD GaAlAs 650nm, typical
Beam Diameter	<5mm at aperture
Pulse Data	All pulses < 4Hz (>0.25sec)
Divergence (each beam)	<2 mrad
Divergence (total light)	<160 degrees
Laser Classification	EN60825-1 2007
Laser Safety Standard	Class 3B
Condition Temperature	10~40°C
DMX Connections	3 pins XLR Male/Female
DMX Channels	10 channels
Measurement	160x160x80mm
N Weight	1.3 Kg

As measured under IEC measurement conditions for classification.
